PROFESSIONAL SUMMARY

Junior Full Stack Developer with production experience across three live MERN applications at Osumare Marketing Solutions, spanning React-based UI development, REST API integration, and backend feature work. Comfortable owning modules end-to-end, from interface implementation through API integration, with additional depth from substantial personal projects covering authentication, real-time systems, payments, and AI agent integration.

TECHNICAL SKILLS

Frontend: React.js, Redux / Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MongoDB Atlas, MySQL, SQLite

Other: Socket.IO, FastAPI, LangGraph, LangChain, Groq, SQLAlchemy, Axios, Razorpay

Tools: Git, GitHub, Postman, VS Code, Render

Programming / CS: Java, Object-Oriented Programming, Data Structures & Algorithms, DBMS

PROFESSIONAL EXPERIENCE

Osumare Marketing Solutions — Pune, India

Junior Full Stack Developer

Dec 2025 – Present

Full Stack Developer Intern

Jun 2025 – Dec 2025

- Promoted to Junior Full Stack Developer after a 6-month internship; continue to deliver features across three production MERN applications: Starplify, FresherFolk, and India Offer.
- Contributed to the redesign and UI overhaul of Starplify, improving user flows and resolving critical UI issues to support a stable production release.
- Built and maintained responsive React features for FresherFolk, integrating REST APIs and handling form data across recruiter- and candidate-facing flows.
- Developed UI and feature modules for India Offer, a multi-vendor offer/discount discovery platform, including responsive implementation and REST API integration.
- Worked independently on assigned modules end-to-end — from UI implementation through backend integration — and contributed to performance optimization and architecture discussions on select features.
- Debugged and resolved UI and functional issues across live, in-production applications.

PROJECTS

LMS — Full Stack Learning Management System

React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Socket.IO, Razorpay

- Built a role-based LMS for Student, Instructor, and Admin roles with JWT authentication, HTTP-only cookies, and protected routes; admin panel supports user management and a course approval workflow (pending → approved/rejected).
- Implemented instructor course creation/management and a student learning flow covering enrollment, a course player, and lecture-level progress tracking through to completion, with Razorpay payment integration backed by MongoDB transactions.
- Structured the backend with a controller–service–middleware–model architecture and MongoDB/Mongoose aggregation pipelines; added real-time, persistent notifications via Socket.IO with authenticated, user-specific rooms.

AI-First CRM — AI-Powered Healthcare CRM

React.js, FastAPI, LangGraph, LangChain, Groq, SQLAlchemy, SQLite, Redux Toolkit, Axios

- Built an AI-first CRM enabling Medical Representatives to log and manage Healthcare Professional (HCP) interactions through natural-language conversation instead of traditional forms.
- Developed a LangGraph-based AI agent with tool calling for interaction logging, editing, HCP search, interaction history, and follow-up suggestions, with data persisted through a layered Service–Repository architecture.
- Implemented a React and Redux Toolkit frontend with Axios, synchronizing AI-generated interaction data between the conversational assistant and the structured CRM interface.

EDUCATION

M.Sc. Computer Science: Savitribai Phule Pune University | 2024–2026 | CGPA: 8.55

B.Sc. Computer Science: Savitribai Phule Pune University | 2021–2024 | Grade: A (8.44)

ACHIEVEMENTS

- Secured 3rd Prize in Poster Presentation at a State-Level Inter-Collegiate Competition.
- Secured 3rd Prize in the “Power of C” college-level programming competition.
